SPSS AMOS Installation

SPSS AMOS is add-on software for the SPSS package published by IBM and it is used for structural equation modeling, path analysis, and covariance structure modelling. The process for installing this application is straightforward, however it contains many steps. Please ensure you follow the instructions below carefully.

Before attempting to install SPSS AMOS, ensure you have acquired an SPSS AMOS licence code from the IT Software self-service web page http://www.gold.ac.uk/it/apps/. Once you have a licence code and have downloaded the necessary SPSS AMOS installer, you can follow the steps below to install the software. At Goldsmiths we provide SPSS AMOS versions 22 & 23 which are only available for Windows PCs, the installation process and activation for both versions is identical, please make sure that you select the version of SPSS AMOS that correlates to your version of SPSS.

Please ensure you are connected to the internet throughout the installation and software licensing process.

1. Once the installer has been downloaded, run the installer
2. Select Single user license (I purchased a single copy of the product)
3. **Select I accept the terms in the license agreement and click Next**
